Cup Placement

The adjustable height coffee spout has two outlets. One or two cups can be placed under the spout. Adjust the height of the spout as close to the cup(s) as possible.

Care Recommendations

CLEANING

- ‘EMPTY GROUNDS CONTAINER’ is displayed when the grounds container is full or if the grounds container has not been emptied for approximately three days. To access the grounds container, open the service door. Slide the drip tray forward to remove. Refer to the illustration below.

- The milk container lid can be disassembled for cleaning. Refer to the illustration below.

DESCALE

Use only EcoDecalk descaling solution.

1. Remove the water tank and empty completely.
2. Fill the tank half full with water then add entire descaler contents. Reinstall the water tank.
3. Install the water spout, then place a large container, more than 50 oz (2 L), under the spout.
4. When the appliance is on, press to access options.
5. Press or until ‘DESCALE’ is displayed, then press . ‘DESCALING UNDERWAY’ will appear on the display.
6. After 30 minutes, ‘RINSING FILL TANK’ is displayed. Fill the water tank with water and empty the large container, then reinstall.
7. Press . ‘RINSING PLEASE WAIT’ will appear on the display.
8. Once the cycle is complete, ‘RINSING COMPLETE’ will appear on the display, then fill container and press . Press and then press .

IMPORTANT NOTE: Do not use detergent to clean the infuser. It will remove lubricant on interior parts.
