Features and specifications are subject to change at any time without notice.

Throughout this guide, dimensions may vary by ± 3 mm.

Classic Series Models

For the Classic series refrigeration, Sub-Zero designers and engineers took a fresh look at everything, inside and out. Exterior refinements include redesigned grilles and lower-profile hinges. Inside, new technology in food preservation makes the Classic series refrigeration nothing short of revolutionary.

914 mm Model	965 mm
1067 mm Model	1118 mm
1219 mm Model	1270 mm

Flush inset is available for overlay models only.
Dimensions assume a 19 mm panel thickness.

Opening Dimensions

DUAL STANDARD INSTALLATION

DUAL OPENING WIDTH

W

A dual installation kit is required for this installation.

Two 914 mm Models	1822 mm
-------------------	---------

Electrical Requirements

Installation must comply with all applicable electrical codes and be properly grounded (earthed).

International models from the factory designed without a transformer require a 220-240 V AC, 50/60 Hz electrical supply, fused at the correct rating for the unit. If required by local or national codes, the power cord can be easily replaced using the power inlet device.

The electrical supply should be located within the shaded area shown in the illustration below. A separate circuit servicing only this appliance is required. A ground fault circuit interrupter (GFCI) is not recommended and may cause interruption of operation.

ELECTRICAL REQUIREMENTS

Electrical Supply	220-240 V AC, 50/60 Hz
Service	10 amp
Receptacle	grounding-type (earthed)

Electrical supply location

Plumbing Requirements

Installation must comply with all applicable plumbing codes.

The water supply line should be located within the shaded area shown in the illustration below. The water supply line should be connected to the house supply with an easily accessible shut-off valve. Do not use self-piercing valves. The water supply line must not interfere with the installation of the anti-tip brackets.

A reverse osmosis system can be used provided there is constant water pressure of 2.4–8.3 bar supplied to the unit at all times. A copper line is not recommended for this application.

PLUMBING REQUIREMENTS

Water Supply Line	6.4 mm OD copper, braided stainless steel, or PEX tubing
Water Pressure	2.4–8.3 bar
Excess Line for Connection	.9 m

Water supply location

Custom Panels

For overlay and flush inset applications, custom door panels must be provided. Handle hardware must also be provided for overlay and flush inset applications. Refer to Panel Requirements below and the charts on the following pages for custom panel dimensions for your specific design application.

IMPORTANT NOTE: Do not cover a glass door with a solid panel.

Finish all sides of the custom panels. They may be visible when the door is open or through the window of glass door models.

PANEL REQUIREMENTS

WEIGHT PER PANEL	MAX
ICBCL3650R, ICBCL3650F, ICBCL3050W	34 kg
All Other Models	23 kg
Grille Panel	6 kg
Panel Thickness	19 mm

PANEL MOUNTING KIT

The Sub-Zero custom panel mounting kit eliminates the need for the backer and spacer panels and is available through an authorized Sub-Zero dealer.

The kit consists of mounting cleats, screws, and gauges used to properly position the cleats. The kit is available for all Classic series models except glass door models. Dual installations require two mounting kits.

ICE AND WATER DISPENSER

For model ICBCL4850SD, the refrigerator door panel must include a cutout to accommodate the external dispenser. The bezel will accommodate a minimum 19 mm thick panel. Panels thicker than 19 mm must be routed to 22 mm in the dispenser area (29 mm) including the backer and spacer panels).

Dispenser dimensions

Overlay Panels

Overlay panels are typically created by combining a 19 mm custom panel, a 3 mm spacer panel, and a 6 mm backer panel. Refer to the illustration below.

When installing two units side by side, refer to page 10 for dual standard installations.

PANEL OFFSET

The illustrations on the right provide panel offsets and reveals for Classic series models in an overlay application. Refer to the chart below for reference to the illustrations.

*Panel height may be increased by 11 mm to hide upper main frame.

Flush Inset Panels

The flush inset application is an overlay model with flush inset panels. It is not a separate model.

The flush inset design allows custom panels to be installed flush with adjacent cabinets. Similar to overlay, flush inset panels are typically created by combining a 19 mm custom panel, a 3 mm spacer panel, and a 6 mm backer panel. Refer to the illustration below.

For flush inset panels thicker than 19 mm, a 90° door stop may be required to prevent interference with adjacent cabinets. Refer to the full-scale templates at the end of this guide.

PANEL OFFSET

The illustrations on the right provide panel offsets and reveals for Classic series models in a flush inset application. Refer to the chart below for reference to the illustrations.

Dual Installation

If two units are installed side by side, a dual installation kit may be required. Installations without a custom filler strip require a dual installation kit. If a dual installation kit is not specified, a 51 mm filler strip is recommended between the units. A custom filler strip is required when installing two French door or side-by-side models. Dual installations without a filler strip can only be accomplished using two units with opposite hinges. Refer to the illustrations below.

Dual installation kits are available through an authorized Sub-Zero dealer.

Opposite hinges

Same side hinges

Side Panel

The custom side panels must be a minimum of 610 mm deep and 13 mm thick. Routing will be necessary for the side panel to fit flush against the side of the unit. Refer to the illustrations below.

When installing a Classic series unit with a custom side panel, an accessory kit is required. Stainless steel side panels are available through an authorized Sub-Zero dealer.

Side panel dimensions

Standard Handles

Optional stainless steel tubular and pro handles are available through an authorized Sub-Zero dealer. Refer to the chart below for standard handle lengths.

HANDLE LENGTH	TUBULAR	PRO
Full Door	1622 mm	1147 mm
Over-and-Under Door	1124 mm	952 mm
914 mm Drawer	770 mm	600 mm
1067 mm Drawer	922 mm	753 mm

Overlay / Flush Inset Panels

FULL-SCALE TEMPLATE

Overlay and flush inset panels must be a minimum of 19 mm thick to support mounting the handle. Panel thickness does not include the backer and spacer panels. Mount the handle close to the opening edge of the door.

Overlay and flush inset panel thickness

Overlay Application

FULL-SCALE TEMPLATE

Flush Inset Application

FULL-SCALE TEMPLATE

For panels thicker than 19 mm, a 90° door stop may be required to prevent interference with adjacent cabinets.

110° door opening (top view)

Dual Standard Installation

FULL-SCALE TEMPLATE

Typical overlay or stainless steel dual installation with filler strip at maximum 110° door opening. Panel thickness may require a 90° door stop.

Dual standard installation (top view)

PRO Series Refrigeration

Freshness finds unmistakable expression with Sub-Zero PRO Series Refrigeration. A monument to food preservation—equal parts sculpted metal design statement and culinary secret weapon. Its vast interior, like its bold exterior, is crafted of stainless steel. Available in 914 mm and 1219 mm widths, with a glass or solid door, and may be either built in or freestanding.

STANDARD OPENING	W	H	D
914 mm Model	902 mm	2127 mm	610 mm
1219 mm Model	1206 mm	2127 mm	610 mm

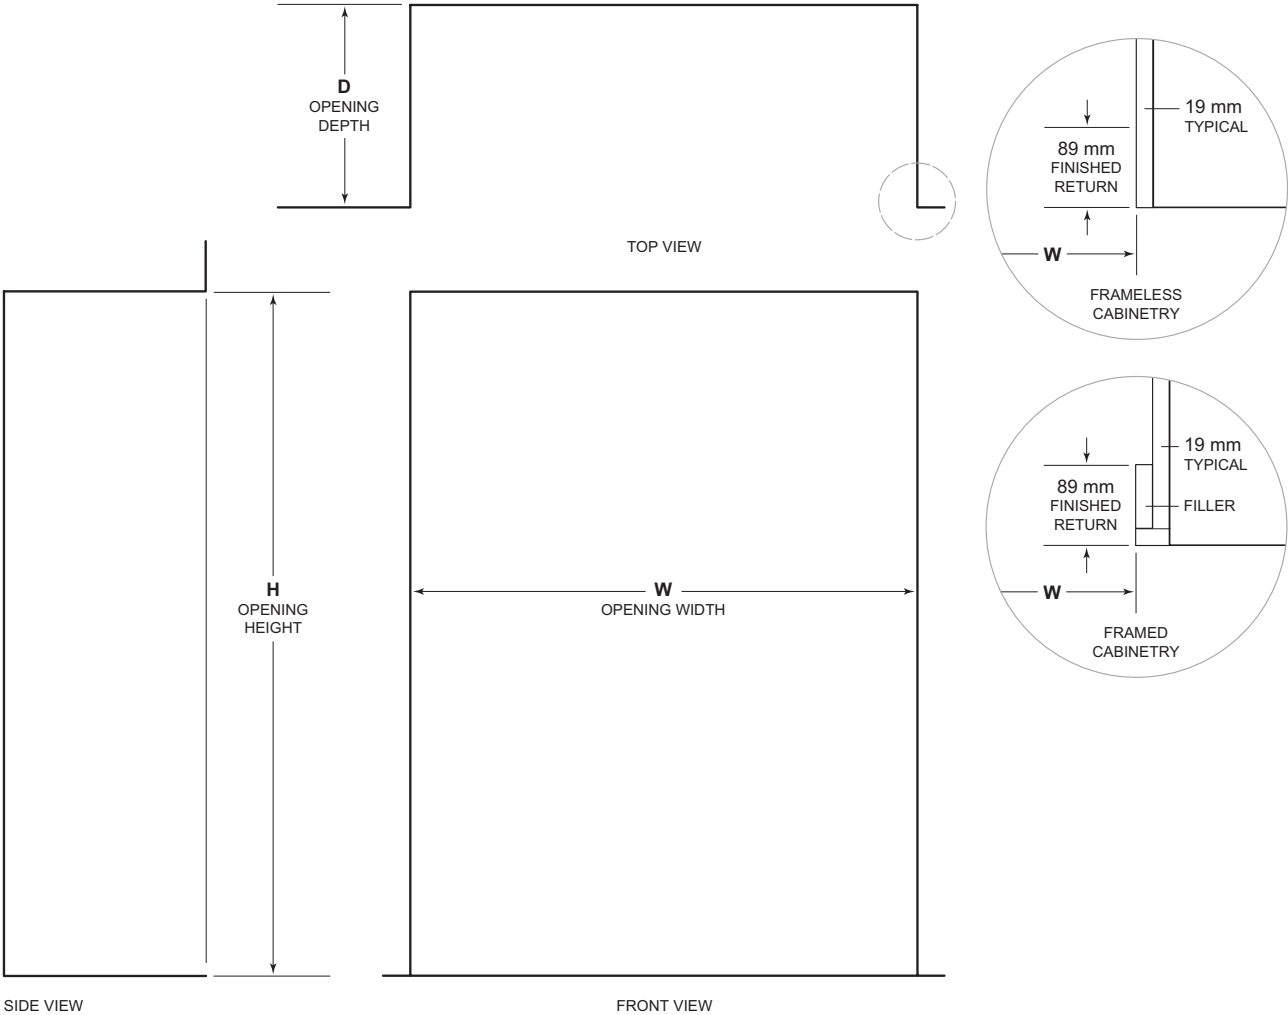

For standard installations, the face frame will extend 51 mm beyond cabinetry.

FLUSH OPENING	W	H	D
914 mm Model	914 mm	2137 mm	660 mm
1219 mm Model	1219 mm	2137 mm	660 mm

For flush installations, the face frame will be flush with surrounding cabinetry.

Opening Dimensions

DUAL STANDARD / FLUSH INSTALLATION

NOTE: 89 mm finished returns will be visible and should be finished to match cabinetry.

DUAL STANDARD OPENING	W	H	D
Two 914 mm Models	1816 mm	2127 mm	610 mm

For standard installations, the face frame will extend 51 mm beyond cabinetry. A dual installation kit is required for this installation.

DUAL FLUSH OPENING	W	H	D
Two 914 mm Models	1829 mm	2137 mm	660 mm

For flush installations, the face frame will be flush with surrounding cabinetry. A dual installation kit is required for this installation.

Dual Installation

If two units are installed side by side, a dual installation kit may be required. Installations without a custom filler strip require a dual installation kit. If a dual installation kit is not specified, a 51 mm filler strip is recommended between the units. Dual installations without a filler strip can only be accomplished using two units with opposite hinges. Refer to the illustrations below.

Dual installation kits are available through an authorized Sub-Zero dealer. For questions regarding the installation, contact your authorized Sub-Zero dealer.

Opposite hinges

Same side hinges

Electrical Requirements

Installation must comply with all applicable electrical codes and be properly grounded (earthed).

International models from the factory designed without a transformer require a 220-240 V AC, 50/60 Hz electrical supply, fused at the correct rating for the unit. If required by local or national codes, the power cord can be easily replaced using the power inlet device.

Locate the electrical supply within the shaded area shown in the illustration below. A separate circuit servicing only this appliance is required. A ground fault circuit interrupter (GFCI) is not recommended and may cause interruption of operation.

ELECTRICAL REQUIREMENTS

Power Supply	220-240 V AC, 50/60 Hz
Circuit Breaker	10 amp
Receptacle	grounding-type (earthed)

Electrical supply location

Plumbing Requirements

Installation must comply with all applicable plumbing codes.

Locate the water supply line within the shaded area shown in the illustration below. Connect the water supply line to the house supply with an easily accessible shut-off valve. Do not use self-piercing valves. The water supply line must not interfere with the installation of the anti-tip bracket.

A reverse osmosis system can be used provided there is constant water pressure of 2.4–8.3 bar supplied to the unit at all times. A copper line is not recommended for this application.

Water supply location

PLUMBING REQUIREMENTS	
Water Supply	6.4 mm OD copper line, braided stainless steel, or PEX tubing
Water Pressure	2.4–8.3 bar
Excess Water Line for Connection	.9 m

Standard Handles

Optional stainless steel pro handles are available through an authorized Sub-Zero dealer. Refer to the chart below for standard handle lengths.

HANDLE LENGTH	914 mm MODEL	1219 mm MODEL
Door	703 mm	703 mm
Refrigerator Drawer	665 mm	506 mm
Freezer Drawer	665 mm	294 mm

Designer Series Refrigeration

With custom front panels and hardware, Sub-Zero invented Designer Series columns, tall, and drawer models that disappear into the decor. Units fit flush with other cabinetry, making Designer Series refrigeration as practical and beautiful in the master suite, bar, or theatre room as in the kitchen. Model ICBID-24RO, approved for outdoor installations, is ideal for any outdoor kitchen.

DESIGNER SERIES

OPENING DIMENSIONS

COLUMN	W*	H
457 mm Column	457 mm	2134 mm
610 mm Column	610 mm	2134 mm
762 mm Column	762 mm	2134 mm
914 mm Column	914 mm	2134 mm

TALL	W*	H
762 mm Tall	762 mm	2134 mm
914 mm Tall	914 mm	2134 mm

DRAWER	W*	H
610 mm Drawer	610 mm	876 mm
762 mm Drawer	762 mm	876 mm

*For stainless steel side panel accessory, add 25 mm per panel to opening width.

The depth of each Designer Series model is 610 mm. Allow for panel thickness when planning the finished opening depth. A minimum 89 mm finished return is required on all sides of the opening—114 mm for the outdoor model. Framed cabinets will require additional finished filler material behind the face frame for a proper installation. Refer to the illustration.

NOTE: 89 mm finished returns will be visible and should be finished to match cabinetry—114 mm for outdoor model.

Dual Installation

When installing two units side by side in a dual installation, the opening width is the width of the two units added together. A dual installation kit will be required for this installation. If a dual installation kit is not specified, a minimum 51 mm filler strip is required between the units.

Dual installation kits are available through an authorized Sub-Zero dealer. For questions regarding the installation, contact your authorized Sub-Zero dealer.

Electrical Requirements

Installation must comply with all applicable electrical codes and be properly grounded (earthed).

The electrical supply must be located within the shaded area shown in the illustration and chart below. A separate circuit servicing only this appliance is required.

IMPORTANT NOTE: For indoor models, a ground fault circuit interrupter (GFCI) is not recommended and may cause interruption of operation.

For the outdoor model, a ground fault circuit interrupter (GFCI) is required to reduce the risk of electrical shock.

The electrical outlet must be positioned with the grounding prong to the right of the thinner blades.

ELECTRICAL REQUIREMENTS

Power Supply	220-240 V AC, 50/60 Hz
Circuit Breaker	10 amp
Receptacle	grounding-type (earthed)

ELECTRICAL SUPPLY LOCATION

457 mm Model	152 mm
610 mm Model	241 mm
762 mm Model	318 mm

Plumbing Requirements

Installation must comply with all applicable plumbing codes.

Locate the water supply line within the shaded area shown in the illustration. Connect the water supply line to the house supply with an easily accessible shut-off valve. Do not use self-piercing valves. The water supply line must not interfere with the installation of the anti-tip bracket.

Column and tall models with an ice maker or water dispenser feature a water filtration system. An in-line filter is required for drawer models with an ice maker when water conditions have a high sediment content.

A reverse osmosis system can be used provided there is constant water pressure of 2.4–8.3 bar supplied to the unit at all times. A copper line is not recommended for this application.

PLUMBING REQUIREMENTS

610 mm Model	140 mm
762 mm Model	152 mm
914 mm Model	229 mm

Water supply location

Stainless Steel Panels

The outdoor model requires the use of Sub-Zero stainless steel outdoor accessory panels. Stainless steel panels are available through an authorized Sub-Zero dealer.

The thickness of indoor stainless steel panels is 19 mm and outdoor stainless steel panels is 38 mm. The depth of each Designer Series model is 610 mm. Allow for panel thickness when planning the finished opening depth.

Reveals of 3 mm are typical, however, the reveal between the upper and lower outdoor stainless steel panels is 6 mm to accommodate the lock.

Custom Panels

For Designer Series models, custom door/drawer panels and handle hardware must be provided.

The thickness of the custom panel can vary. A minimum 16 mm thick panel is required, but the thickness can be increased provided it does not exceed the maximum panel weight indicated in the chart below. The depth of each Designer Series model is 610 mm. Allow for panel thickness when planning the finished opening depth. Refer to the full-scale template on page 43.

Reveals between panels can vary, 3 mm reveals are typical.

⚠ CAUTION

As reveals between cabinetry and the unit decrease, severe finger pinching can occur while the door is closing.

Finish all sides of the custom panels. They will be visible when the door/drawer is open.

D-style handles are recommended. Locate the door handle near the edge of the panel opposite the hinge and centered top to bottom. Locate the drawer handles near the top edge of each panel. Stainless steel tubular and pro handles are available through an authorized Sub-Zero dealer.

PANEL REQUIREMENTS

WEIGHT PER PANEL	MAX
457 mm Column	20 kg
610 mm Column	27 kg
762 mm Column	34 kg
914 mm Column	34 kg
WEIGHT PER PANEL	MAX
762 mm Tall (door)	22 kg
914 mm Tall (door)	27 kg
Drawer Panel	7 kg
PANEL THICKNESS	MIN
All Panels	16 mm

Custom Panels

TYPICAL PANEL DIMENSIONS

Typical panel dimensions are based on a 2134 mm finished height for column and tall models and 876 mm for drawer models, with a 102 mm toe kick and 3 mm reveals. Panel dimensions must be adjusted accordingly for all other installations. Refer to the illustration for panel height and the chart below for panel width.

PANEL WIDTH	W
457 mm Model	451 mm
610 mm Model	603 mm
762 mm Model	756 mm
914 mm Model	908 mm

DUAL INSTALLATION

For dual installations, refer to the illustration for panel height and the chart below for panel width.

PANEL WIDTH—DUAL INSTALLATION	W
457 mm Model	452 mm
610 mm Model	605 mm
762 mm Model	757 mm
914 mm Model	910 mm

Custom Panels

DOOR PANEL HEIGHT

The height of the custom door panel can extend beyond the typical panel height, provided it does not exceed the weight limit. Refer to the illustration below.

Upper valance—column and tall (side view)

TOE KICK CLEARANCE

For indoor models only, the height of the toe kick area can extend beyond the typical toe kick height, provided it does not exceed the dimensions in the illustration below. Toe kick heights from 51 mm to 98 mm require a reduced toe kick accessory available through an authorized Sub-Zero dealer.

Toe kick (side view)

Standard Handles

Optional stainless steel tubular and pro handles are available through an authorized Sub-Zero dealer. Refer to the chart below for standard handle lengths.

HANDLE LENGTH	TUBULAR	PRO
Column Door	1273 mm	1229 mm
Tall Door	845 mm	800 mm
610 mm Drawer	540 mm	495 mm

ICBDEC2450W	610 mm
ICBDEC3050W	762 mm

TALL	W*
ICBDET3050WR	762 mm

*For stainless steel side panel accessory, add 25 mm per panel to opening width.

The depth of each model is 610 mm. Allow for panel thickness when planning the finished opening depth. A minimum 89 mm finished return is required on all sides of the opening. Framed cabinets will require additional finished filler material behind the face frame for a proper installation. Refer to the illustration.

DUAL INSTALLATION

The unit can be installed next to a Designer Series refrigeration model or another Designer Series wine storage model in a dual installation. When installing two units side by side, the opening width is the width of the two units added together. A dual installation kit will be required for this installation. If a dual installation kit is not specified, a minimum 51 mm filler strip is required between the units.

Dual installation kits are available through an authorized Sub-Zero dealer. For questions regarding the installation, contact your authorized Sub-Zero dealer.

Overall Dimensions

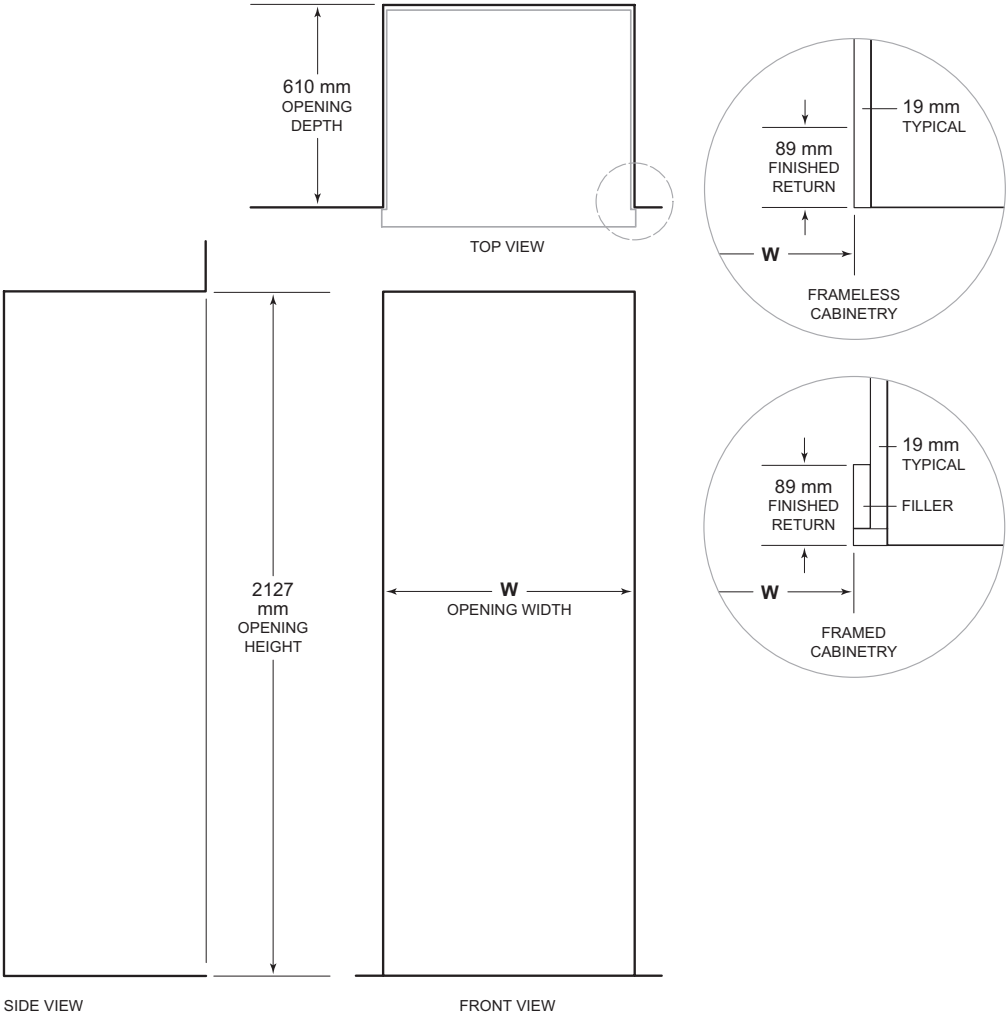

MODEL ICBCL3050W

Dimensions are based on the stainless steel model. For flush inset applications, add 13 mm to the door clearance dimensions.

A dual installation kit is required for this installation.

Two Models ICBCL3050W	1518 mm
Model ICBCL3050W and 914 mm Classic Series model	1670 mm

Electrical Requirements

Installation must comply with all applicable electrical codes and be properly grounded (earthed).

International models from the factory designed without a transformer require a 220-240 V AC, 50/60 Hz electrical supply, fused at the correct rating for the unit. If required by local or national codes, the power cord can be easily replaced using the power inlet device.

The electrical supply must be located within the shaded area shown in the illustration for your specific model. For Designer Series models, also refer to the chart. A separate circuit servicing only this appliance is required. A ground fault circuit interrupter (GFCI) is not recommended and may cause interruption of operation.

If the unit will be connected to a home security system, allow 914 mm of excess wiring for proper connection.

IMPORTANT NOTE: For Undercounter and Designer Series models, the electrical outlet must be positioned with the grounding prong to the right of the thinner blades.

ELECTRICAL REQUIREMENTS

Electrical Supply	220-240 V AC, 50/60 Hz
Circuit Breaker	10 amp
Receptacle	grounding-type (earthed)

ELECTRICAL SUPPLY LOCATION A

Designer Series models

Model ICBDEU2450W

Model ICBCL3050W

Custom Panels

For all models excluding stainless steel, door panels and handles must be provided. Refer to the panel requirements and custom panel dimensions charts for your specific model and design application.

Do not install a solid panel on a glass door unit. A solid door is available as a sales accessory (except model ICBCL3050W) and must be installed if a solid panel is specified. Service may be required to install the door. Contact an authorized Sub-Zero dealer for more information. Overall dimensions are the same for glass and solid door panels.

Finish all sides of the custom panels. They may be visible when the door is open or through the window of a glass door model.

A D-style handle is recommended. Locate the door handle near the edge of the panel opposite the hinge and centered top to bottom. Stainless steel tubular and pro handles are available through an authorized Sub-Zero dealer.

CAUTION

As reveals between cabinetry and the unit decrease, severe finger pinching can occur while the door is closing.

Custom Panel—ICBDEU2450W

For model ICBDEU2450W, the custom door panel will attach directly to the door frame with screws through a series of pre-drilled holes. Refer to the following charts for panel requirements and dimensions.

The panel cannot exceed the maximum panel weight indicated in the chart below. The depth of each model is 587 mm. Allow for panel thickness when planning the finished opening depth.

PANEL REQUIREMENTS

Panel Weight	10 kg max
Panel Thickness	16 mm min– 19 mm max

TYPICAL PANEL DIMENSIONS

PANEL DIMENSIONS

MODEL	W	H
ICBDEU2450W	603 mm	772 mm
STILES / RAILS		MIN
Stiles		83 mm
Top Rail		89 mm
Bottom Rail		114 mm

DUAL INSTALLATION

For dual installations, refer to the chart below for typical panel dimensions.

PANEL DIMENSIONS—DUAL INSTALLATION

MODEL	W	H
ICBDEU2450W	605 mm	772 mm

Custom Panel—ICBDEU2450W

TOE KICK CLEARANCE

The height of the toe kick area can extend beyond the typical toe kick height, provided it does not exceed the dimensions in the illustration below.

Toe kick clearance (side view)

MAXIMUM DOOR OPENING

As the panel width and/or depth increases, so does the potential for panel interference. Interference may be minimized by using the 90° door stop.

Maximum door opening (top view)

Custom Panels—Designer Series

For Designer Series models, custom door panels and handle hardware must be provided. Refer to the panel requirements chart and typical panel dimensions.

Do not install a solid panel on the glass door unit. A solid door is available as a sales accessory through an authorized Sub-Zero dealer.

The thickness of the custom panel can vary. A minimum 16 mm thick panel is required, but the thickness can be increased provided it does not exceed the weight limit. The depth of each Designer Series model is 610 mm. Allow for panel thickness when planning the finished opening depth. Refer to the full-scale template on page 43.

⚠ CAUTION

As reveals between cabinetry and the unit decrease, severe finger pinching can occur while the door is closing.

Finish all sides of the custom panels. They will be visible when the door/drawer is open.

D-style handles are recommended. Door handles must be located near the edge of the panel opposite the hinge and should be centered top to bottom. Drawer handles must be located near the top edge of each panel. Stainless steel tubular and pro handles are available through an authorized Sub-Zero dealer.

PANEL REQUIREMENTS	
PANEL WEIGHT	MAX
Door Frame (column)	16 kg
Door Frame (tall)	11 kg
Drawer Panel	7 kg
PANEL THICKNESS	MIN
All Panels	16 mm

Custom Panels—Designer Series

TYPICAL PANEL DIMENSIONS

Typical panel dimensions are based on a 2134 mm finished height with a 102 mm toe kick and 3 mm reveals. Panel dimensions must be adjusted accordingly for all other installations. Refer to the illustration for panel heights and the chart below for panel widths.

PANEL WIDTH	W
457 mm Column	451 mm
610 mm Column	603 mm
762 mm Column	756 mm
762 mm Tall	756 mm

STILES / RAILS	MIN
Stiles	83 mm
Top Rail	197 mm
Bottom Rail (column)	241 mm
Bottom Rail (tall)	114 mm

DUAL INSTALLATION

For dual installations, refer to the illustration for panel height and the chart below for panel width.

PANEL WIDTH—DUAL INSTALLATION	W
457 mm Column	452 mm
610 mm Column	605 mm
762 mm Column	757 mm
762 mm Tall	757 mm

Custom Panels—Designer Series

DOOR PANEL HEIGHT

The height of the custom door panel can extend beyond the typical panel height, provided it does not exceed the weight limit. Refer to the illustration below.

Upper valance—column and tall (side view)

TOE KICK CLEARANCE

The height of the toe kick area can extend beyond the typical toe kick height, provided it does not exceed the dimensions in the illustration below. Toe kick heights from 51 mm to 98 mm require a reduced toe kick accessory available through an authorized Sub-Zero dealer.

Toe kick (side view)

Custom Panels—ICBCL3050W

OVERLAY PANELS

Overlay panels are typically created by combining a 19 mm custom panel, a 3 mm spacer panel, and a 6 mm backer panel. Refer to the illustrations below.

PANEL REQUIREMENTS

PANEL WEIGHT	MAX
Door	34 kg
Grille	6 kg
PANEL THICKNESS	MIN
Overlay	16 mm

Panel assembly cross section (overlay)

Panel assembly rear view

OVERLAY PANEL DIMENSIONS

GRILLE	W	H
Overlay Panel	762 mm	197 mm*
Spacer Panel	740 mm	173 mm
Backer Panel	756 mm	189 mm

*Panel height may be increased by 11 mm to hide upper main frame.

Custom Panels—ICBCL3050W

FLUSH INSET PANELS

The flush inset application is an overlay model with flush inset panels. It is not a separate model.

The flush inset design allows custom panels to be installed flush with adjacent cabinets. Similar to overlay, flush inset panels are typically created by combining a 19 mm custom panel, a 3 mm spacer panel, and a 6 mm backer panel. Refer to the illustrations for overlay panels on the previous page.

For flush inset panels thicker than 19 mm, a 90° door stop may be required to prevent interference with adjacent cabinets. Refer to the full-scale template on page 67.

PANEL REQUIREMENTS

PANEL WEIGHT	MAX
Door	34 kg
Grille	6 kg
PANEL THICKNESS	MIN
Flush Inset	16 mm

FLUSH INSET PANEL DIMENSIONS

ICBCL3050W

FLUSH INSET PANELS

DUAL INSTALLATIONS

A dual installation kit may be required if two models ICBCL3050W or a model ICBCL3050W and a Classic Series unit are installed side by side. Installations without a custom filler strip require a dual installation kit. If a dual installation kit is not specified, a 51 mm filler strip is recommended between the units. Dual installations without a filler strip can only be accomplished using two units with opposite hinges. Refer to the illustrations below.

Dual installation kits are available through an authorized Sub-Zero dealer. For questions regarding the installation, contact your authorized Sub-Zero dealer.

For dual standard installations, panel dimensions are the same as for single installations.

Opposite hinges

Same side hinges

Custom Panels—ICBCL3050W

SIDE PANEL

The custom side panel must be a minimum of 610 mm deep and 13 mm thick. Routing will be necessary for the side panel to fit flush against the side of the unit. Refer to the illustrations below.

When installing model ICBCL3050W with a custom side panel, an accessory kit is required. Stainless steel and white enamel side panels are available through an authorized Sub-Zero dealer.

Side panel dimensions

Standard Handles

Optional stainless steel tubular and pro handles are available through an authorized Sub-Zero dealer.

Refer to the chart below for standard handle lengths for wine storage models.

HANDLE LENGTH	TUBULAR	PRO
ICBDEU2450W	614 mm	572 mm
ICBDEC1850W	1273 mm	1229 mm
ICBDEC2450W	1273 mm	1229 mm

Receptacle	grounding-type (earthed)

Electrical supply location

Custom Panel

For all models excluding stainless steel, a door panel and handle must be provided. Refer to the panel requirements and custom panel dimensions charts.

Do not install a solid panel on a glass door unit. A solid door is available as a sales accessory and must be installed if a solid panel is specified. Service may be required to install the door. Contact an authorized Sub-Zero dealer for more information. Overall dimensions are the same for glass and solid door panels.

Finish all sides of the custom panel. They may be visible when the door is open or through the window of a glass door model.

A D-style handle is recommended. Locate the door handle near the edge of the panel opposite the hinge and centered top to bottom. Stainless steel tubular and pro handles are available through an authorized Sub-Zero dealer.

⚠ CAUTION

As reveals between cabinetry and the unit decrease, severe finger pinching can occur while the door is closing.

Custom Panel

The panel cannot exceed the maximum panel weight indicated in the chart below. The depth of each model is 587 mm. Allow for panel thickness when planning the finished opening depth.

Sub-Zero International Limited Warranty

FOR RESIDENTIAL USE

FULL TWO YEAR WARRANTY*

For two years from the date of original installation, this Sub-Zero product warranty covers all parts and labor to repair or replace, under normal residential use, any part of the product that proves to be defective in materials or workmanship. All service provided by Sub-Zero under the above warranty must be performed by Sub-Zero Factory Certified Service, unless otherwise specified by Sub-Zero, Inc. Service will be provided during normal business hours.

FULL FIVE YEAR SEALED SYSTEM WARRANTY

For five years from the date of original installation, this Sub-Zero product warranty covers all parts and labor to repair or replace, under normal residential use, these parts that prove to be defective in materials or workmanship: compressor, condenser, evaporator, drier and all connecting tubing. All service provided by Sub-Zero under the above warranty must be performed by Sub-Zero Factory Certified Service, unless otherwise specified by Sub-Zero, Inc. Service will be provided during normal business hours.

For more information regarding your Sub-Zero product warranty, contact your authorized Sub-Zero dealer. Warranties must comply to all country, state, city, local and or ordinance.

*Stainless steel (doors, panels, handles, product frames and interior surfaces) are covered by a limited 60-day parts and labor warranty for cosmetic defects.

*Replacement water filters and air purification cartridges are not covered by the product warranty.

Sub-Zero International Outdoor Limited Warranty*

FOR RESIDENTIAL USE

FULL ONE YEAR WARRANTY**

For one year from the date of original installation, this Sub-Zero product warranty covers all parts and labor to repair or replace, under normal residential use, any part of the product that proves to be defective in materials or workmanship. All service provided by Sub-Zero under the above warranty must be performed by Sub-Zero Factory Certified Service, unless otherwise specified by Sub-Zero, Inc. Service will be provided during normal business hours.

FULL FIVE YEAR SEALED SYSTEM WARRANTY

For five years from the date of original installation, this Sub-Zero product warranty covers all parts and labor to repair or replace, under normal residential use, these parts that prove to be defective in materials or workmanship: compressor, condenser, evaporator, drier and all connecting tubing. All service provided by Sub-Zero under the above warranty must be performed by Sub-Zero Factory Certified Service, unless otherwise specified by Sub-Zero, Inc. Service will be provided during normal business hours.

TERMS APPLICABLE TO EACH WARRANTY

The warranty applies only to products installed for normal residential use. This warranty does not cover any parts or labor to correct any defect caused by negligence, accident or improper use, maintenance, installation, service or repair.

For more information regarding your Sub-Zero product warranty, contact your dealer. Warranties must comply to all country, state, city, local and or ordinance.

*Product must be approved for outdoor use, designated by model and serial number.

**Stainless steel (doors, panels, handles, product frames and interior surfaces) are covered by a limited 60-day parts and labor warranty for cosmetic defects.

**Replacement water filters and air purification cartridges are not covered by the product warranty.
