

4204720 - Stainless Steel Side Panel (Models 648PRO & 648PROG)

⚠ CAUTION

Metal panels may have sharp edges which could inflict serious personal injury. Use care when handling. This sales accessory package is heavy and unstable. If it were to fall on someone, it could cause serious injury. Lay it flat when unpacking.

NOTE: The protective tape coating must be peeled off front of stainless steel panels before installing.

NOTE: There is sound insulating foam tape applied to the back of the panel that should not be removed.

NOTE: If a top panel will also be installed, the side panels must be installed first.

CONTAINS:

QUANTITY	DESCRIPTION
1	Stainless Steel Side Panel
6	Side Panel Bracket
18	Screws, # 8 Rivgrip
2	Sound deadening Foam Pad
1	Instructions

PROCEDURE:

1. Attach the six side panel brackets to the side of the unit by align the holes of each bracket with the mounting holes in the unit's side, then insert the #8 Rivgrip screws through the holes in the brackets, into the mounting holes using a T-20 Torx drive.
2. To hang the side panel, lift it above the bracket, push it against the unit's side, then let it slide down so that the panel mounting slots fit over and hook onto the brackets.
3. Make sure all brackets are engaged by lightly pulling outward on panel while checking for proper position.
