Handleless Design

Custom Door Panel

HANDLELESS DESIGN

There are many ways to achieve a handleless design. Sub-Zero does not endorse any particular handleless design. Panel dimensions must be adjusted accordingly. A handleless design can only be achieved using a custom panel. Sub-Zero does not offer a stainless steel panel to accommodate a handleless design. The reference below is one example of a handleless installation of a 32½" tall unit in a 34½" opening.
