M Series Built-In Ovens

Four striking looks are just the beginning. Superior performance features include our dual convection fan system, touch-screen controls, convenient preset cooking programs, and improved interior lighting. There is more usable space inside for deliciousness on a grand scale. M Series Ovens can be installed in a standard or flush inset application.

Planning Information

The M Series Oven can be installed in a standard or flush inset application. If a cooktop is installed above an oven, a minimum of 6 mm is required between the units. Location of the electrical supply within the oven opening may require additional cabinet depth.

Finish the edges of the opening. They may be visible when the door is open.

For standard installations, the face trim will overlap stiles and rails. Refer to the chart below.

For flush inset installations, a minimum 3 mm reveal is required on all sides. To ensure consistent reveals, each corner of the opening must be exactly 90°.

INSTALLATION REQUIREMENTS

BASE SUPPORT		MIN
Single Oven		115 kg
Double Oven		181 kg
TRIM OVERLAP		
Top		25 mm
Bottom		0 mm
Sides		18 mm

DUAL INSTALLATION

Two 76 cm single M Series Ovens can be installed side by side in a standard or flush inset application. A dual installation kit is required. To maintain appropriate airflow, the ovens must be installed into one opening. Any cosmetic or structural material placed between the ovens will impede airflow and is not recommended. Refer to the illustrations on the following pages.

The dual installation kit is available through an authorized Wolf dealer.

Planning Information

ELECTRICAL REQUIREMENTS

Installation must comply with all applicable electrical codes and be properly grounded (earthed).

Locate the electrical supply flush with the back wall and within the shaded area shown in the illustration for your specific installation on the following pages. For ease of installation, the electrical supply for the oven can be placed in an adjacent cabinet within reach of the conduit.

Performance may be compromised if the electrical supply is less than 220 volts.

The oven is supplied with a single phase and 3-phase convertible power inlet box. The wiring diagram covering the control circuit is provided with the oven.

ELECTRICAL REQUIREMENTS—SINGLE OVEN

<b>ELECTRICAL SUPPLY</b>	
Single Phase	220–240 V AC, 50/60 Hz
3-Phase	380–415 V AC, 50 Hz
<b>MAX CONNECTED LOAD</b>	
Single Phase	4.2–4.8 kW
3-Phase	3.0–3.6 kW

ELECTRICAL REQUIREMENTS—DOUBLE OVEN

<b>ELECTRICAL SUPPLY</b>	
Single Phase	220–240 V AC, 50/60 Hz
3-Phase	380–415 V AC, 50 Hz
<b>MAX CONNECTED LOAD</b>	
Single Phase	8.4–9.6 kW
3-Phase	4.2–4.8 kW

DUAL STANDARD INSTALLATION

NOTE: Location of electrical supply within opening may require additional cabinet depth. A dual installation kit is required for this installation.

M Series Single Oven

DUAL FLUSH INSET INSTALLATION

\*25 mm minimum depth. Shaded areas will be visible and should be finished to match cabinetry.

\*\*22 mm for transitional, professional and contemporary stainless steel models and 25 mm for contemporary black glass model.

\*\*\*Dimension provides minimum reveals.

NOTE: Location of electrical supply within opening may require additional cabinet depth. A dual installation kit is required for this installation.

### E Series Built-In Ovens

The Wolf E Series Convection Oven has two fans and four heating elements. Ten cooking modes allow you to select the one precisely suited to the dish you're preparing. The oven is self-cleaning. E Series Ovens are crafted of stainless steel. The handles match the rest of the Wolf cooking appliance offering, providing a more cohesive look. E Series Ovens can be installed in a standard or flush inset application.

Convection Steam Ovens

The legacy of the “combination oven” goes back decades, to innovative chefs in America and Europe who embraced the combination of air movement with superheated steam to achieve superior results—from breads and roasts to delicate fishes, seafood, and vegetables. Wolf combines the benefits of convection and steam for the most innovative steam oven on the market today. Virtually any dish prepared in a conventional oven, range, or microwave can also be prepared in the Wolf Convection Steam Oven—with more control. Two widths and three distinct styles compliment the look of Wolf ovens, ranges, and cooktops. Convection Steam Ovens can be installed in a standard or flush inset application.

Planning Information

The Convection Steam Oven can be installed in a standard or flush inset application. The back of the base support must be open for water and drain line accessibility and routing. Refer to the illustration below.

Finish the edges of the opening. They may be visible when the door is open.

For standard installations, the face trim overlaps stiles and rails. Refer to the chart below.

For flush inset installations, a minimum 3 mm reveal is required on all sides. To ensure consistent reveals, each corner of the opening must be exactly 90°.

INSTALLATION REQUIREMENTS

Bottom	0 mm	0 mm
Sides	22 mm	16 mm

Base support

ELECTRICAL REQUIREMENTS

Installation must comply with all applicable electrical codes and be properly grounded (earthed).

For ease of installation, the electrical supply for the oven should be placed in an adjacent cabinet within reach of the conduit.

Performance may be compromised if the electrical supply is less than 230 volts.

The oven is supplied with a conduit consisting of two hot lead conductors and a ground conductor. The wiring diagram covering the control circuit is provided with the oven.

ELECTRICAL REQUIREMENTS

Electrical Supply	grounded, 230 VAC, 50 Hz
Service	20 amp dedicated circuit
Conduit	1.2 m
Total Amps	16
Max Connected Load	4.2 kW

Plumbing Requirements

MODEL ICBCSOP2450TE/S/T

Installation must comply with all applicable plumbing codes.

The drain tube connection must be a minimum 51 mm below the unit and a minimum 102 mm from the floor. Locate the drain and water connections below the unit or in an adjacent cabinet. Any opening into the adjacent cabinet must meet the following: the longest dimension of the opening shall not be more than 38 mm. The edges of the opening must be smooth and round.

**IMPORTANT NOTE:** The drain location can vary, but must be within reach of the corrugated tubing. Do not extend or reduced the drain tubing. A drain line high loop is required. Refer to the illustration below.

PLUMBING REQUIREMENTS

Water Connection	2 m braided tubing with 3/8" female compression fitting
Drain Connection	3 m corrugated tubing with 22 mm outlet
Pressure	0.1–1.0 MPa

Connect the water supply to a cold water house supply with an easily accessible shut-off valve between the supply and the unit.

Purge the water supply prior to final connection to the unit. This will remove any debris that may be present in the tubing from installing the new water supply. Connect the braided tubing from the unit to the house water supply with the fitting provided. Check all water supply fittings for leaks.

## Warming Drawers

Wolf Warming Drawers are designed to take care of prepared foods until it is time to serve them. You can adjust the temperature, keeping moist foods moist and crisp foods crisp. Warming Drawers are ideal for proofing dough. Drawer fronts are available to match the look of Wolf Ovens and Sealed Burner Rangetops. The integrated drawer front allows for a custom panel and handle.

CUSTOM PANEL

Warming Drawers

DRAWER FRONT OPTIONS

Wolf Warming Drawer fronts allow for many design options, but the Warming Drawer itself will be the same for all applications. A panel mounting kit is required when installing a custom panel. The panel mounting kit is available through an authorized Wolf dealer.

The 51 mm thick drawer front is designed to be installed below a Sealed Burner Rangetop, so the panel aligns properly with the front of the rangetop. Dimensions for the Warming Drawer remain the same, even though the drawer front may be wider to match a Wolf 91 cm Oven or Sealed Burner Rangetop.

DIMENSIONS

DRAWER FRONT

MODEL	W	
76 cm Drawer Front	759 mm	
91 cm Drawer Front	911 mm

Professional (51 mm thick)	54 mm	114 mm

INTEGRATED DRAWER FRONT

CUSTOM PANEL	W	H	D
Typical Dimensions	759 mm	264 mm	19 mm
Min Thickness			16 mm

Planning Information

The Warming Drawer must be installed with a Wolf drawer front, available through an authorized Wolf dealer. Specific installation instructions are included with the drawer front.

The Warming Drawer can be installed in a standard or flush inset application.

For a standard installation, the drawer collar and front panel sit proud of the cabinet face frame. A recessed installation requires the cabinetry be recessed by 5 mm so the collar is flush with the cabinet face frame but the drawer front will sit proud. A flush inset installation requires the drawer collar and front panel be recessed to be flush with surrounding cabinetry. Refer to the illustrations on the following pages for minimum cabinet dimensions for your specific installation.

Finish the edges of the opening. They may be visible when the drawer is open.

For standard installations, the face trim will overlap stiles and rails. Refer to the chart below.

For flush inset installations, a minimum 3 mm reveal is required on all sides. To ensure consistent reveals, each corner of the opening must be exactly 90°.

INSTALLATION REQUIREMENTS

Minimum Base Support	90 kg
Trim Overlap (top, bottom, sides)	16 mm

ELECTRICAL REQUIREMENTS

Installation must comply with all applicable electrical codes and be properly grounded (earthed).

Locate the electrical supply flush with the back wall and within the shaded area shown in the illustrations on the following pages. For ease of installation, the electrical supply for the Warming Drawer can be placed in an adjacent cabinet within reach of the power cord.

ELECTRICAL REQUIREMENTS

Electrical Supply	220-240 V AC, 50/60 Hz

## Induction Cooktops

Almost instantaneous temperature response. Practically no wasted heat. Induction cooking has been popular among European chefs and homeowners for decades. Now Wolf leads the way in bringing this remarkable technology to North American kitchens. Its secret is magnetism. Electromagnetic elements cause iron and magnetic stainless cookware to heat up instantly and with perfectly distributed heat. Heat generation stops the instant you turn off the element or remove the pan. The cooktop's surface remains cool. Your kitchen stays cooler too. Transitional models have a brushed stainless steel trim. Contemporary models can be mounted flush with the countertop.

The following models have the same stainless steel frame as our module cooktops for paired installations: ICBCI243TF/S, ICBCI304TF/S, and ICBCI365TF/S.

279 mm	2600 / 3700 boost	
(2) 203 mm	2100 / 3000 boost	
(2) 203 mm	2100	

## Planning Information

A minimum height clearance of 159 mm is required from the top of the countertop to any combustible surface directly below the cooktop.

Contemporary Induction Cooktops can be mounted flush with the top of the countertop, or as a frameless standard installation sitting on top of the countertop surface. If the cooktop is to be mounted flush with the countertop, a recessed area surrounding the cooktop cutout must be provided.

**IMPORTANT NOTE:** Flush mount installations are intended for granite, solid surface, or stone countertop surfaces only.

### ELECTRICAL REQUIREMENTS

Installation must comply with all applicable electrical codes and be properly grounded (earthed).

Locate the electrical supply as shown in the illustrations on the following pages. A separate circuit servicing only this appliance is required.

Performance may be compromised if the electrical supply is less than 220 volts.

The cooktop is supplied with a single phase and 3-phase convertible power inlet box.

Gas Cooktops

Like their oven counterparts, the new generation of Wolf Gas Cooktops features two new looks—transitional and professional. New performance enhancements make delicious results even more of a certainty than ever. Multiple sizes, choice of knob colors, and distinctly different grates—the new Gas Cooktops offer exceptional design flexibility.

Planning Information

A minimum 51 mm is required from the bottom of the cooktop to combustible materials. If a cooktop is installed above an oven, a minimum of 6 mm is required between the units.

ELECTRICAL REQUIREMENTS

Installation must comply with all applicable electrical codes and be properly grounded (earthed).

Locate the electrical supply as shown in the illustration on the following pages. A separate circuit servicing only this appliance is required. A ground fault circuit interrupter (GFCI) is not recommended and may cause interruption of operation.

ELECTRICAL REQUIREMENTS

Electrical Supply	220-240 V AC, 50/60 Hz
Service	0.2 A
Receptacle	grounding-type (earthed)
Power Cord	1.8 m

GAS SUPPLY

Installation must conform with all applicable gas codes.

A gas supply line of 19 mm rigid pipe must be provided to the cooktop. If local codes permit, a certified, .9 m long, 13 mm or 19 mm ID flexible metal appliance connector is recommended to connect the units ½" NPT (or ISO 7/1-14) male inlet to the gas supply line.

Gas Cooktops contain a regulator for natural gas and LP gas.

Wolf natural gas cooktops will function up to 3124 m in altitude without adjustment and LP gas cooktops will function up to 2621 m. If the installation exceeds these elevations, contact an authorized Wolf dealer for a high altitude conversion kit.

## Module Cooktops

Wolf 38 cm Modules have been redesigned to match the updated lines of Sub-Zero and Wolf. Controls, grates, and trim allow them to integrate perfectly with their larger counterparts and deliver equal performance. Combine Modules à la carte-style to create a custom cooktop, or add specialty functions alongside an existing cooktop.

Full-size cooktops including ICBCI243TF/S, ICBCI304TF/S, and ICBCI365TF/S feature the same brushed stainless frame, making them ideal for pairing with Modules.

Countertop cutout

Planning Information

ELECTRICAL REQUIREMENTS

Installation must comply with all applicable electrical codes and be properly grounded (earthed).

Locate the electrical supply as shown in the illustrations on the following pages. A separate circuit servicing only this appliance is required.

The induction cooktop is supplied with a single phase and 3-phase convertible power inlet box.

When multiple cooktops or Modules are installed side by side, each must have its own separate electrical supply.

ELECTRICAL REQUIREMENTS

INDUCTION MODULE

Single Phase	220-240 VAC, 50/60 Hz
3-Phase	380-415 V AC, 50 Hz
Total Amps	16

ELECTRIC MODULES

Electrical Supply	220-240 VAC, 50/60 Hz
Steamer	2700 W
Grill	2800 W

GAS MODULES

Electrical Supply	220-240 VAC; 50/60 Hz
Service	0.2 A
Receptacle	grounding-type (earthed)
Power Cord	1.8 m

DRAIN OUTLET

The Steamer Module requires a method for draining hot water. Options include connecting a drain hose from the 16 mm outlet tied into an existing drain, a separate drain with freefall, or placing a heat-resistant receptacle under the drain outlet.

GAS SUPPLY

Installation must conform with all applicable gas codes.

For gas Modules, a gas supply line of 19 mm rigid pipe must be provided to the module. If local codes permit, a certified, .9 m long, 13 mm or 19 mm ID flexible metal appliance connector is recommended to connect the units ½" NPT (or ISO 7/1-14) male inlet to the gas supply line.

When multiple Gas Cooktops or Modules are installed side by side, they can receive their gas supply from a common line. However, each unit must have its own regulator installed between the mainline and the cooktop or Module.

Wolf natural gas cooktops will function up to 3124 m in altitude without adjustment and LP gas cooktops will function up to 2621 m. If the installation exceeds these elevations, contact an authorized Wolf dealer for a high altitude conversion kit.

## Coffee Systems

Make professional-quality coffee, espresso, cappuccino, latte, and more. The Wolf Coffee System automatically steams and foams the milk perfectly. The water temperature and brew strength are adjustable. It uses either whole-bean or ground coffee. The design pairs beautifully, either side-by-side or in a tower application, with other Wolf products such as the Convection Steam Oven. The Coffee System can be installed in a standard or flush inset application.

### COFFEE SYSTEMS

ICBEC3050CM/S

ICBEC3050CM/B

Coffee System

DIMENSIONS

WIDTH	W
60 cm Model	597 mm
76 cm Trim	759 mm

Planning Information

The Coffee System can be installed in a standard or flush inset application. The sides of the cabinet opening must be adequate to support installation of the mounting slides. Refer to the illustration below.

Finish the edges of the opening.

For standard installations, the face trim overlaps stiles and rails. Refer to the chart below.

For flush inset installations, a minimum 3 mm reveal is required on all sides. Each corner of the opening must be exactly 90° to maintain consistent reveals.

INSTALLATION REQUIREMENTS

Coffee System	45 kg	
<b>TRIM OVERLAP</b>	<b>60 cm MODEL</b>	<b>76 cm MODEL</b>
Top	5 mm	5 mm
Bottom	0 mm	0 mm
Sides	18 mm	98 mm

ELECTRICAL REQUIREMENTS

Installation must comply with all applicable electrical codes and be properly grounded (earthed).

Locate the electrical supply as shown in the illustrations on the following pages. A separate circuit servicing only this appliance is required. A ground fault circuit interrupter (GFCI) is not recommended and may cause interruption of operation.

ELECTRICAL REQUIREMENTS

Electrical Supply	220-240 V AC, 50/60 Hz
Service	1350 W
Receptacle	grounding-type (earthed)
Power Cord	1.8 m

COMBINATION INSTALLATION

If a Coffee System is installed above a Cup Warming Drawer, specify one opening for both units. To achieve the minimum reveal between the units, place the Coffee System support rails on top of the Cup Warming Drawer, then secure the rails to the sides of the cabinet. Any material between the units will increase the horizontal reveal between the two products.

Side support

Coffee System  
STANDARD INSTALLATION

NOTE: 610 mm model and model with 762 mm trim require the same opening dimensions.

### DIMENSIONS

## Planning Information

The Cup Warming Drawer can be installed in a standard or flush inset application. Finish the edges of the opening. They may be visible when the drawer is open.

For standard installations, the face trim will overlap stiles and rails. Refer to the chart below.

For flush inset installations, a minimum 3 mm reveal is required on all sides. To ensure consistent reveals, each corner of the opening must be exactly 90°.

An anti-tip block must be installed to prevent the Cup Warming Drawer from tipping forward when opened.

### INSTALLATION REQUIREMENTS

Minimum Base Support	34 kg
----------------------	-------

### TRIM OVERLAP

Top	0 mm
Bottom	0 mm
Sides	18 mm

## COMBINATION INSTALLATION

To install a Cup Warming Drawer below a Coffee System, one opening for both units must be specified. To achieve the minimum reveal between units, place the Coffee System support rails on top of the Cup Warming Drawer, then secure the rails to the sides of the cabinet. Any material between the units will increase the horizontal reveal.

Installation of an anti-tip block is not necessary when the Cup Warming Drawer is installed below a Coffee System.

## ELECTRICAL REQUIREMENTS

Installation must comply with all applicable electrical codes and be properly grounded (earthed).

Locate the electrical supply as shown in the illustrations on the following pages. A separate circuit servicing only this appliance is required. A ground fault circuit interrupter (GFCI) is not recommended and may cause interruption of operation.

Dual Fuel Ranges

Discover a new world of cooking—the best of two worlds, actually—with a Wolf Dual Fuel Range. Topside, gas cooking in all its glory, with the fine control of dual-stacked, sealed burners and options including charbroiler and griddle. Below, that marvel of culinary technology, the Wolf convection electric oven. Its two fans and four heating elements let you select from ten cooking modes so you can choose the one precisely suited to the dish you’re preparing. The ovens are self-cleaning. With a variety of range widths to choose from, kitchens large and small become gateways to the exciting new world of dual fuel cooking. All models are constructed of stainless steel and can be ordered in natural or LP gas.

Overall Dimensions

Planning Information

When installing against a combustible surface, a minimum 254 mm riser is required for a 91 cm Wolf Dual Fuel Range with charbroiler or griddle and all 122 cm and 152 cm models. Follow all minimum clearances to combustible surfaces shown in the illustration on the following page.

A Wolf Pro Ventilation Hood is recommended with the Wolf Dual Fuel Range. Refer to Pro Ventilation on page 106.

ELECTRICAL REQUIREMENTS

Installation must comply with all applicable electrical codes and be properly grounded (earthed).

Locate the electrical supply flush with the wall or floor and within the shaded area shown in the illustration on the following page. A separate circuit servicing only this appliance is required.

If a power supply cord is used, the cord must be designated for use with ranges and rated for 240 V, 30 or 50 amps (refer to the chart below), and must include 3 or 4 conductors.

Performance may be compromised if the electrical supply is less than 240 volts.

152 cm Range	40.8 A	19.2 A

## Planning Information

### GAS REQUIREMENTS

Installation must conform with all applicable gas codes.

Locate the gas supply within the shaded area shown in the illustration on the following page.

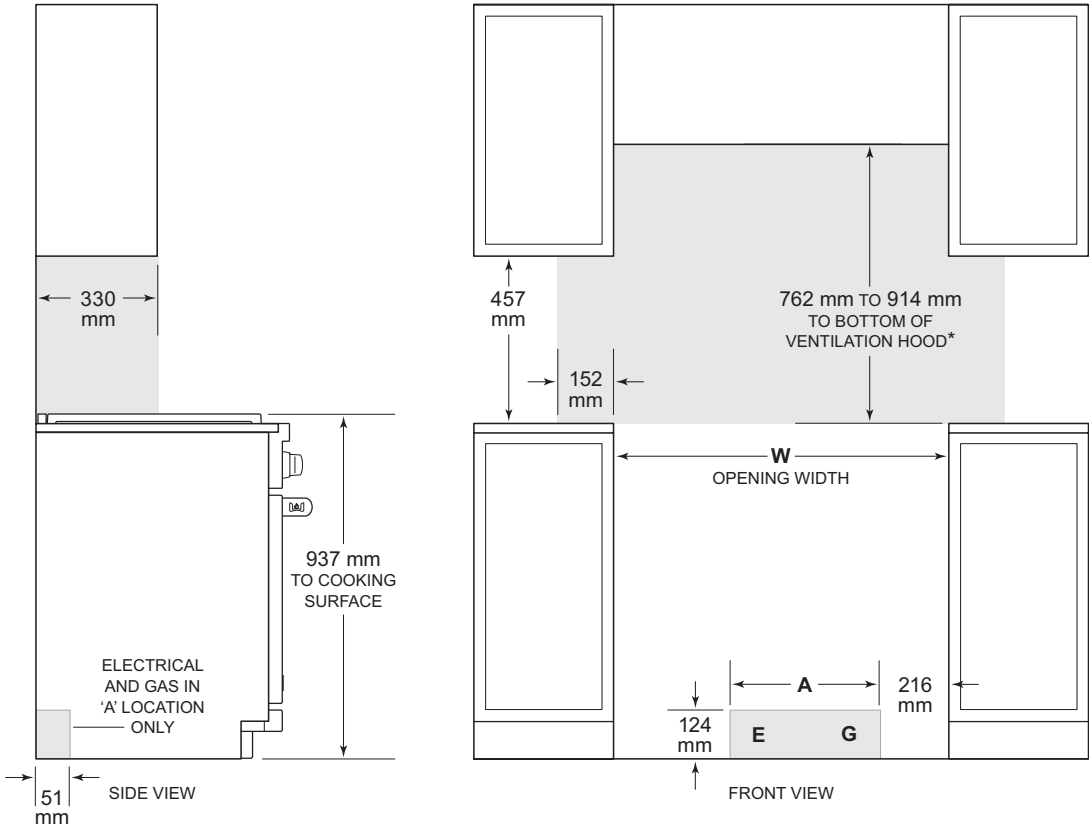

A gas supply line of 19 mm rigid pipe must be provided to the range. If local codes permit, a certified, .9 m long, 13 mm or 19 mm ID flexible metal appliance connector is recommended to connect the units ISO 7/1-14 female inlet to the gas supply line.

Wolf natural gas ranges will function up to 3124 m in altitude without adjustment and LP gas ranges will function up to 2621 m. If the installation exceeds these elevations, contact an authorized Wolf dealer for a high altitude conversion kit.

GAS SUPPLY PRESSURE	WC

## Induction Ranges

Experience a new way of cooking with a Wolf Induction Range. Magnetism allows the ultrafast, energy efficient surface elements to heat up instantly and with perfectly distributed heat. Heat generation stops the instant you turn off the element or remove the pan. The cooktop's surface remains cool. Your kitchen stays cooler too. The electric convection oven with two fans and four heating elements let you select from ten cooking modes and is self-cleaning. Wolf Induction Ranges are constructed of stainless steel and come in 76 cm and 91 cm widths.

Outdoor Grills and Modules

Taste what happens when the heritage of professional cooking moves from the kitchen to the patio. Like their indoor counterparts, Wolf Outdoor Grills are precision instruments. Constructed of heavy-duty stainless steel, the 76 cm, 91 cm, 107 cm, and 137 cm Grills have powerful burners every five inches for even heat distribution. An electric rotisserie with infrared burner produces succulent poultry and roasts. All Grill models can be built in and all except the 137 cm Grill, can be used on a cart for portable convenience. The 25,000 Btu Burner Module can be built into an outdoor kitchen and the Side Burner attached to a cart. Wolf Grills and Modules can be ordered in natural or LP gas.

Planning Information

For portable applications, Wolf Grill carts are designed specifically to fit Grill models ICBOG30, ICBOG36, and ICBOG42 and the Side Burner. Model ICBOG54 is designed for built-in applications only.

For built-in applications, Wolf Outdoor Grills and the Burner Module are designed for easy placement into a built-in enclosure. For Outdoor Grills, installation in a combustible enclosure requires an insulating liner. For the Burner Module, an insulating liner is not required. The enclosure should be built according to specifications for your specific installation on the following pages. If the Burner Module is installed next to an Outdoor Grill, a minimum of 305 mm is required between the units. A rotisserie side conversion kit is available from an authorized Wolf dealer.

Optional stainless steel accessory doors and drawers are available for built-in applications. Refer to pages 90–94.

Grill carts, insulating liners, and stainless steel doors and drawers are available through an authorized Wolf dealer.

ELECTRICAL REQUIREMENTS

Installation must comply with all applicable electrical codes and be properly grounded (earthed).  
  
The electrical outlet must be located within reach of the power cord. A separate circuit servicing only this appliance is required.

**IMPORTANT NOTE:** A ground fault circuit interrupter (GFCI) or residual current device (RCD) is required to reduce the risk of electrical shock.

Electrical Supply—Output	12 VDC
Service	0.5 A (6 Watts)
Receptacle	barrel plug, 2.1 mm ID x 5.5 mm OD

Planning Information

GAS SUPPLY

Installation must conform with all applicable gas codes.

A gas supply line of 19 mm rigid pipe must be provided to the outdoor grill or module. If local codes permit, a certified, .9 m long, 13 mm or 19 mm ID flexible metal appliance connector is recommended to connect the units ISO 7-1 female inlet to the gas supply line.

An inline regulator is installed on the unit for connecting to NAT or LP gas sources. For local dealer information, visit our website, [wolfappliance.com](http://wolfappliance.com).

If the Outdoor Grill is being connected to a whole house LP supply, the LP gas pressure regulator is not provided. It can be purchased from an authorized Wolf dealer.

## Cooktop Ventilation Hoods

The new generation of Wolf Cooktop Ventilation Hoods feature two new looks—black and stainless. Brilliant LED lighting illuminates your cooking surface while powerful multi-speed blowers whisk away smoke and odors. The dishwasher-safe filters can be removed easily for cleaning. The wall-mount and island hoods are crafted of stainless steel.

ISLAND HOOD—STAINLESS

\*1175 mm to 1397 mm with accessory flue extension.

Planning Information

Wolf Cooktop Ventilation Hoods are recommended for use with Wolf Induction and Gas Cooktops, and Modules. For Wolf Ranges and Rangetops, a Wolf Pro Ventilation hood is recommended.

These hoods have a telescopic chimney flue. A flue extension is available through an authorized Wolf dealer.

Installation of the Cooktop Hood should be 762 mm to 914 mm from the bottom of the hood to the countertop.

Wall and island hoods require an internal or remote blower assembly, available through an authorized Wolf dealer. Refer to Ventilation Suggestions on pages 110–112. Cooktop Hoods have a vertical discharge with 152 mm round duct.

Consult a qualified HVAC professional for specific installation and ducting applications.

ELECTRICAL REQUIREMENTS

Installation must comply with all applicable electrical codes and be properly grounded (earthed).

For wall hoods, locate the electrical supply within the shaded area shown in the illustration below. For island hoods, locate the electrical supply on the ceiling inside the top of the hood. A separate circuit servicing only this appliance is recommended.

ELECTRICAL REQUIREMENTS

Electrical Supply	220-240 V AC, 50 Hz 220 V AC, 60 Hz
Service	1.9 A

762 mm TO 914 mm BOTTOM EDGE TO COUNTERTOP

Electrical location for all wall hoods

Ceiling-Mounted Hood

The new Ceiling-Mounted Hood is our most contemporary ventilation offering, nearly disappearing into its surroundings. It comes in two widths and is available in stainless steel. The hood ships with a remote control and can be operated using the remote control or the control panel. The control panel is recessed into the right side of the hood. The dishwasher-safe filters can be removed easily for cleaning.

CEILING-MOUNTED HOODS

DIMENSIONS

DIMENSIONS	W	A
91 cm Hood	902 mm	841 mm
122 cm Hood	1200 mm	1121 mm

## Planning Information

Installation of the Ceiling-Mounted Hood should be 914 mm to 2134 mm from the bottom of the hood to the countertop.

The hood can be operated using the remote control or the control panel located on the right side of the hood.

The hood is shipped without a blower assembly. A 900 CMH internal blower is available through an authorized Wolf dealer. Refer to Ventilation Suggestions on pages 110–112.

The Ceiling-Mounted Hood includes a 152 mm round discharge for the internal blower. The blower box can be rotated to discharge right, left, front, or rear.

Consult a qualified HVAC professional for specific installation and ducting applications.

## RECIRCULATING INSTALLATION

The Ceiling-Mounted Hood with internal blower can be installed in a recirculating application. The air discharge must be a minimum of 1016 mm from every side of the hood. Refer to the illustration below. The ductwork and vent cover are not provided. A recirculation kit, available through an authorized Wolf dealer, is required.

Recirculation application

Planning Information

ELECTRICAL REQUIREMENTS

Installation must comply with all applicable electrical codes and be properly grounded (earthed).

Locate the electrical supply within the shaded area shown in the illustration below. Allow a minimum 305 mm electrical cable for connection. A separate circuit servicing only this appliance is required.

Downdraft Ventilation

Constructed of heavy duty stainless steel, the Wolf Down-draft rises from the countertop to whisk away odor and smoke into stainless steel, mesh filters and can be lowered beneath the countertop when not in use.

DOWNDRAFT

ICBDD36

Downdraft

DIMENSIONS

NOTE: Shown with front mounted internal blower with 152 mm round discharge, dashed line represents rear mount.

WIDTH	W	A
ICBDD36	914 mm	826 mm

Planning Information

Wolf Downdrafts can be installed with most Wolf Cooktops, but are not compatible with the Grill and Steamer Modules. Contact an authorized Wolf dealer for details.

For installation with a Wolf Cooktop, a minimum 638 mm deep flat countertop is required.

The remote-mounted control module must be located within 2.7 m of the Downdraft assembly and a minimum 76 mm from the edge of the cooktop cutout.

BLOWERS

Internal and remote blowers are available through an authorized Wolf dealer. Refer to Ventilation Suggestions on pages 110–112.

Internal blowers include a 152 mm round discharge and can be front or rear mounted. It can be discharged in any direction by rotating the blower box. Remote blowers include a 254 mm discharge and can be discharged from the front or rear.

Consult a qualified HVAC professional for specific installation and ducting applications.

ELECTRICAL REQUIREMENTS

Installation must comply with all applicable electrical codes and be properly grounded (earthed).

Locate the electrical supply as shown in the illustrations on the following pages. A separate circuit servicing only this appliance is required. A ground fault circuit interrupter (GFCI) is not recommended and may cause interruption of operation.

Certain installations may require that the electrical supply be placed in an adjacent cabinet.

## Pro Ventilation Hoods

Professional heritage shines through in Wolf professional-style ventilation. Exteriors are heavy-duty, welded stainless steel, so finely hand-finished that they appear seamless. Pro Wall Hoods are available in 61 cm and 69 cm depths and a variety of widths. Stainless steel baffle filters and halogen lighting extend the professional look and back it up with pro-level performance. All Pro Ventilation Hoods are crafted of stainless steel.

Planning Information

Pro Ventilation Hoods are recommended for use with all Wolf cooking appliances. Wall hoods should be at least as wide as the cooking surface.

For optimal performance in wall hood applications, a pro 69 cm deep wall hood is recommended for use with ranges and rangetops with a charbroiler or griddle.

Installation of the hood should be 762 mm to 914 mm from the bottom of the hood to the countertop.

Pro Ventilation Hoods are shipped without a blower assembly. Remote blowers are available through an authorized Wolf dealer. The blower will vary in size and is dictated by the cooking unit, volume of air, and length of the duct run. Refer to Ventilation Suggestions on pages 110–112.

Pro Hoods accommodate a 254 mm round duct and have a vertical discharge. For the 61 cm and 69 cm deep wall hoods, a horizontal discharge kit is available through an authorized Wolf dealer.

Consult a qualified HVAC professional for specific installation and ducting applications.

Optional stainless steel duct covers in a variety of heights are available for Pro Wall Hoods through an authorized Wolf dealer.

ELECTRICAL REQUIREMENTS

Installation must comply with all applicable electrical codes and be properly grounded (earthed).

Locate the electrical supply within the shaded area shown in the illustration on the following page. Allow a minimum 305 mm electrical cable for connection. A separate circuit servicing only this appliance is required.

ELECTRICAL REQUIREMENTS

Electrical Supply	220-240 V AC, 50 Hz 220 V AC, 60 Hz
Service	1.9 A

Installation

61 cm / 69 cm DEEP WALL HOODS

762 mm TO 914 mm BOTTOM EDGE TO COUNTERTOP

## Blower Assemblies

For Wolf Ventilation Hoods and Downdrafts that do not include a blower assembly, an internal or remote blower assembly must be selected to accommodate the cooking appliance, CMH requirements, and homeowner preferences. Internal and remote blowers are available through an authorized Wolf dealer.

Ventilation Suggestions on the following pages provide Wolf product CMH and blower options for each Ventilation Hood and Downdraft.

Refer to the illustrations below for the dimensions of Wolf remote blowers. Installation instructions shipped with each Wolf ventilation product provide detailed specifications.

### Wolf Appliance International Limited Warranty

#### FOR RESIDENTIAL USE

##### FULL TWO YEAR WARRANTY\*

For two years from the date of original installation, this Wolf Appliance product warranty covers all parts and labor to repair or replace, under normal residential use, any part of the product that proves to be defective in materials or workmanship. All service provided by Wolf Appliance under the above warranty must be performed by Wolf Factory Certified Service, unless otherwise specified by Wolf Appliance, Inc. Service will be provided during normal business hours.

##### LIMITED THIRD THROUGH FIFTH YEAR WARRANTY

For five years from the date of original installation, Wolf Appliance will repair or replace the following parts that prove to be defective in materials or workmanship: gas burners (excluding appearance), electric heating elements, blower motors (ventilation hoods), electronic control boards, magnetron tubes and induction generators. The part(s) will be repaired or replaced, free of charge, with the owner paying for all other costs including labor. All service provided by Wolf Appliance under the above warranty must be performed by Wolf Factory Certified Service, unless otherwise specified by Wolf Appliance, Inc. Service will be provided during normal business hours.

For more information regarding your Wolf product warranty, contact your authorized Wolf dealer. Warranties must comply to all country, state, city, local and or ordinance.

\*Stainless steel (doors, panels, handles, product frames and interior surfaces) are covered by a limited 60-day parts and labor warranty for cosmetic defects.

### Wolf Appliance International Outdoor Limited Warranty\*

#### FOR RESIDENTIAL USE

#### FULL ONE YEAR WARRANTY\*\*

For one year from the date of original installation, this Wolf Appliance product warranty covers all parts and labor to repair or replace, under normal residential use, any part of the product that proves to be defective in materials or workmanship. All service provided by Wolf Appliance under the above warranty must be performed by Wolf Factory Certified Service, unless otherwise specified by Wolf Appliance, Inc. Service will be provided during normal business hours.

#### LIMITED FIVE YEAR WARRANTY

For five years from the date of original installation, Wolf Appliance will repair or replace the following parts that prove to be defective in materials or workmanship: stainless steel briquette trays, gas valves, drip pans, electronic control boards and electric heating elements. If the owner uses Wolf Factory Certified Service, the service provider will repair or replace these parts with the owner paying for all other costs, including labor. If the owner uses non-certified service, the owner must contact Wolf Appliance, Inc. (using the information below) to receive repaired or replacement parts. Wolf Appliance will not reimburse the owner for parts purchased from non-certified service or other sources.

For more information regarding your Wolf product warranty, contact your authorized Wolf dealer. Warranties must comply to all country, state, city, local and or ordinance.

\*Product must be approved for outdoor use, designated by model and serial number.

\*\*Stainless steel (doors, panels, handles, product frames and interior surfaces) are covered by a limited 60-day parts and labor warranty for cosmetic defects.
